Economical

UltraRack IT Rack Extension Frame is a retrofitting solution to instantly increase rack depth and avoid disruptive replacements. Easily accommodate next-generation servers, PDUs, high-density cabling and liquid cooling solution.

Key Benefits

- **Retrofit Depth Extension**
Expand internal mounting space while keeping existing hardware and enclosures in place.
- **Optimized for Deep Servers**
Engineered for rapid-growth environments requiring high-performance, deep-chassis server installations.
- **Add Space for PDU Installation**
Allow mounting for vertical PDUs when rear rack space is limited by deep rack-mount servers and equipment.
- **Facilitate cable management**
Allow for the effortless addition of cabling accessories via the seamless depth expansion.
- **Liquid Cooling Solution**
Easily upgrade for the rack with liquid cooling.
- **Smart Retrofitting**
Extend lifecycle of your current rack enclosures and reduce environmental waste without sacrificing performance.
- **Cost-Effective Scalability**
Negate the need for new rack purchases and slashes the labor costs associated with de-installing and re-cabling.
- **Rapid Deployment**
Attach quickly to existing rack hinges and door(s).
